

SHUBHAM PATHRIKAR

Junior Consultant

Pune, India | +91-8275238847 | shubhampathrikar07@gmail.com | linkedin.com/in/shubhampathrikar

PROFESSIONAL SUMMARY

Software engineer with 7+ years of experience delivering Java and Spring-based solutions, microservices, APIs, event-driven integrations, and legacy-system modernization. Experienced in designing scalable distributed services, improving system data flows, and translating operational requirements into maintainable technical implementations. Strong background in cross-functional collaboration, release/process design, production troubleshooting, and integration technologies including Apache Kafka, IBM MQ and Axway CFT.

CORE TECHNICAL COMPETENCIES

Architecture & Integration: Microservices, REST APIs, event-driven architecture, system integration, data flows, legacy modernization

Languages and Frameworks: Java, Spring Boot, Spring WebFlux, Spring Cloud Config, Hibernate, Spring JPA

Messaging & Transfer: Apache Kafka, IBM MQ, Axway CFT, CRON

Cloud / DevOps: Pivotal Cloud Foundry (PCF), Jenkins, Maven, Gradle, Git, Bitbucket

Data & Testing: SQL, Oracle SQL Developer, JUnit 4/5, Mockito, BDD, TDD

Collaboration: Stakeholder collaboration, analytical troubleshooting, technical problem solving, multicultural teamwork

PROFESSIONAL EXPERIENCE

Junior Consultant | T-Systems Pvt. Ltd., Pune, India

Mar 2022 – Present

Current Project: Logbus Cars Modernization – Modernization of Logistics Applications in the Automotive Domain

- Engineered RESTful backend services for the LOGBUS Cars Modernization project, improving integration between frontend and backend components and supporting efficient system data flows.
- Prepare cost and effort estimates for new features and enhancements, evaluating technical scope, implementation complexity, dependencies, and required development effort.
- Developed interactive Angular/Highcharts visualizations for dynamic business metrics, helping present operational data in an accessible form.
- Worked in cross-functional delivery environments, contributing to troubleshooting, implementation decisions, and coordination across technical and project stakeholders.

Previous Project: Logbus Trucks Migration – Logistics Applications in the Automotive Domain

- Design of an end-to-end Release Management Process for the LOGBUS Trucks Transition project, coordinating implementation activities across stakeholders and streamlining operational execution.
- Managed secure file-transfer integrations using Axway CFT and CRON, collaborating with internal and external stakeholders to establish interfaces, address integration dependencies, and ensure reliable end-to-end data flows across connected systems.

Programmer | Bitwise Inc., Pune, India

Aug 2019 – Jan 2022

Project: Discover Internet – Applications in Banking domain

- Designed and implemented Spring Boot APIs that automated business processes, contributing to a 95% reduction in operational costs and reported annual savings of \$30M.
- Designed and implemented a microservices-based distributed architecture processing approximately 50,000 alerts daily, using Apache Kafka and IBM MQ for real-time event handling, scalability and fault tolerance.
- Modernized legacy applications by migrating IBM WebSphere Application Server from WAS8 to WAS9 and transitioning SOAP-based integrations to REST APIs, reducing technical debt and improving maintainability.
- Performed root-cause analysis and resolved production issues to maintain high system reliability and support continuous service availability.

EDUCATION

Bachelor of Computer Engineering | Savitribai Phule Pune University, Pune, India

Jun 2015 – Jun 2019 | CGPA: 7.98

LANGUAGES

English: Fluent | Hindi: Native | Marathi: Native
